# 24-BIT COLOR WideTEK

Image Access' WideTEK High-Speed Large-Format flatbed scanner produces crisp, clear 24-bit color images at up to 600dpi. Scanning in a production environment, the WideTEK scanner captures color images in 3 seconds for a 17" x 24" at 300dpi!

Scan books, catalogs, newspapers, magazines, large-format documents, photographs, maps, architectural drawings and more. With WideTEK's rich functionality, you can achieve high throughput with bound and stapled documents while maintaining high image quality.

## Technical

<b>Format Patterns</b>	Auto format Paper formats up to size-C User-defined formats
<b>Optical Resolutions</b>	600 dpi optical max DIN A4 400 dpi optical max DIN A3 300 dpi optical max DIN A2
<b>Scan Speed (in 24-bit color mode)</b>	< 3 seconds at maximum resolution and maximum scan area
<b>Scan Modes</b>	24-bit Color 8-bit Grayscale Bitonal
<b>Output Formats</b>	JPEG, TIFF, TIFF G4, PNM (raw data)
<b>Throughput</b>	Max: 5280 A2 Images Per Shift* Typical: 3000-4000 A2 Images Per Shift* (* based on 8 hour shift)

## Features

- Optimized data compression keeps the files small and accelerates the data transfer.
- A fast preview with a scalable zoom enables direct quality control of the scan.
- WideTEK scanners offer several different file formats; store images as color, grayscale, bitonal or all of the above without additional scans!
- High quality and crisp legibility of the images support further processing by OCR software.
- Foot Pedal included

## Benefit

Today, most offices use laser printers and conventional copiers side by side. Usually the network laser printer is used far more frequently than the copier.

The WideTEK scanner becomes a fast copier with the use of an existing network printer. Compared to copier-soft of the same speed, it presents a lower-priced solution.

The WideTEK scanner integrates into the modern office environment perfectly; at approximately 4 inches tall, it's significantly smaller than most copiers

## Software Control

BSCAN capture software offers control of all the WideTEK's features and includes a full complement of image processing tools as well as capture work-flow for high-production applications.

- Powerful workflow production systems
- Export to virtually any database
- Publish to the internet or CD
- Scan, Copy, Fax, Print and e-mail both single and multi-page TIFF files
